INITIAL MESSAGE

1. Comments on Navy issues presented to the IG/CM:

a. The Agency has supported national policy on the use
of polygraph testing at any forum where we have membership.b. NSA has funded R&D in the area of emergency destruc-
tion. Until a prototype is developed the IC does not have
anything to support.

25X1

c. Everyone recognizes the need for ADP security.
SECOM is addressing and [redacted] has been retained by
the IC to study this problem.

SECRET

25X1 SUBJECT: IG/CM Meeting Scheduled 03 June 1983

25X1 d. There is a national policy on secure telephones and has been since 1975. There was national funding to the tune of for STU IT's last year.

25X1 e. Recognize the need but the IC cannot agree on a definition. Policy on DES is a classic example.

2. Comments on new agenda item from NSA-Cryptographic Access Requirements:

a. It is believed that only the Agency retained the crypto clearance access program when national policy was relaxed in 1973. We still have the program and no plans are being considered to dump it. There may be some streamlining in the form of administrative procedures, but that is all.

25X1 b. As a point of interest, the USG flip-flops on this issue about every ten years. The NCSC is now on the positive flip and has a good deal of support to reinstate the program on a national scale.
